ECO  PRO 

The vibration baits («vibs» or «rattlins») are successfully used for catching predatory fish and can be applied equally well as classic spinner baits for casting and as lures for vertical fishing from a boat. When fishing in the most hard-to-reach spots, the use of vibs for vertical jigging provokes even a very lazy and choosy predator to strike.

VIB NEMO

055 Shiny Shad  
UV Glow and reflect UV light

032 Pearl Canary UV Glow and reflect UV light

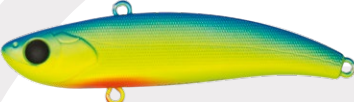

077 Hot Tiger UV Glow and reflect UV light

This is a compact fat-bodied lure producing an expressive wide «balanced» swimming action. But at the same time it falls into the water with specific for «vibs» vibrations. The lure proved to be productive when fishing with spinning rods or vertical jigging for perch and zander in Russian water bodies.

YETI

The vertical jigging spoon Yeti is ideal for perch, but with this spoon you can successfully catch zander and pike. Its main target is active fish, but it attracts passive species as well. The Yeti is supplied in three sizes: 30 mm, 40 mm and 50 mm. The smaller-sized spoons are perfect for perch, but also suited for roach, ruffe, ide and bream. The 50 mm spoon works well for perch and gar. The spoon features fluttering action moving aside from the vertical.

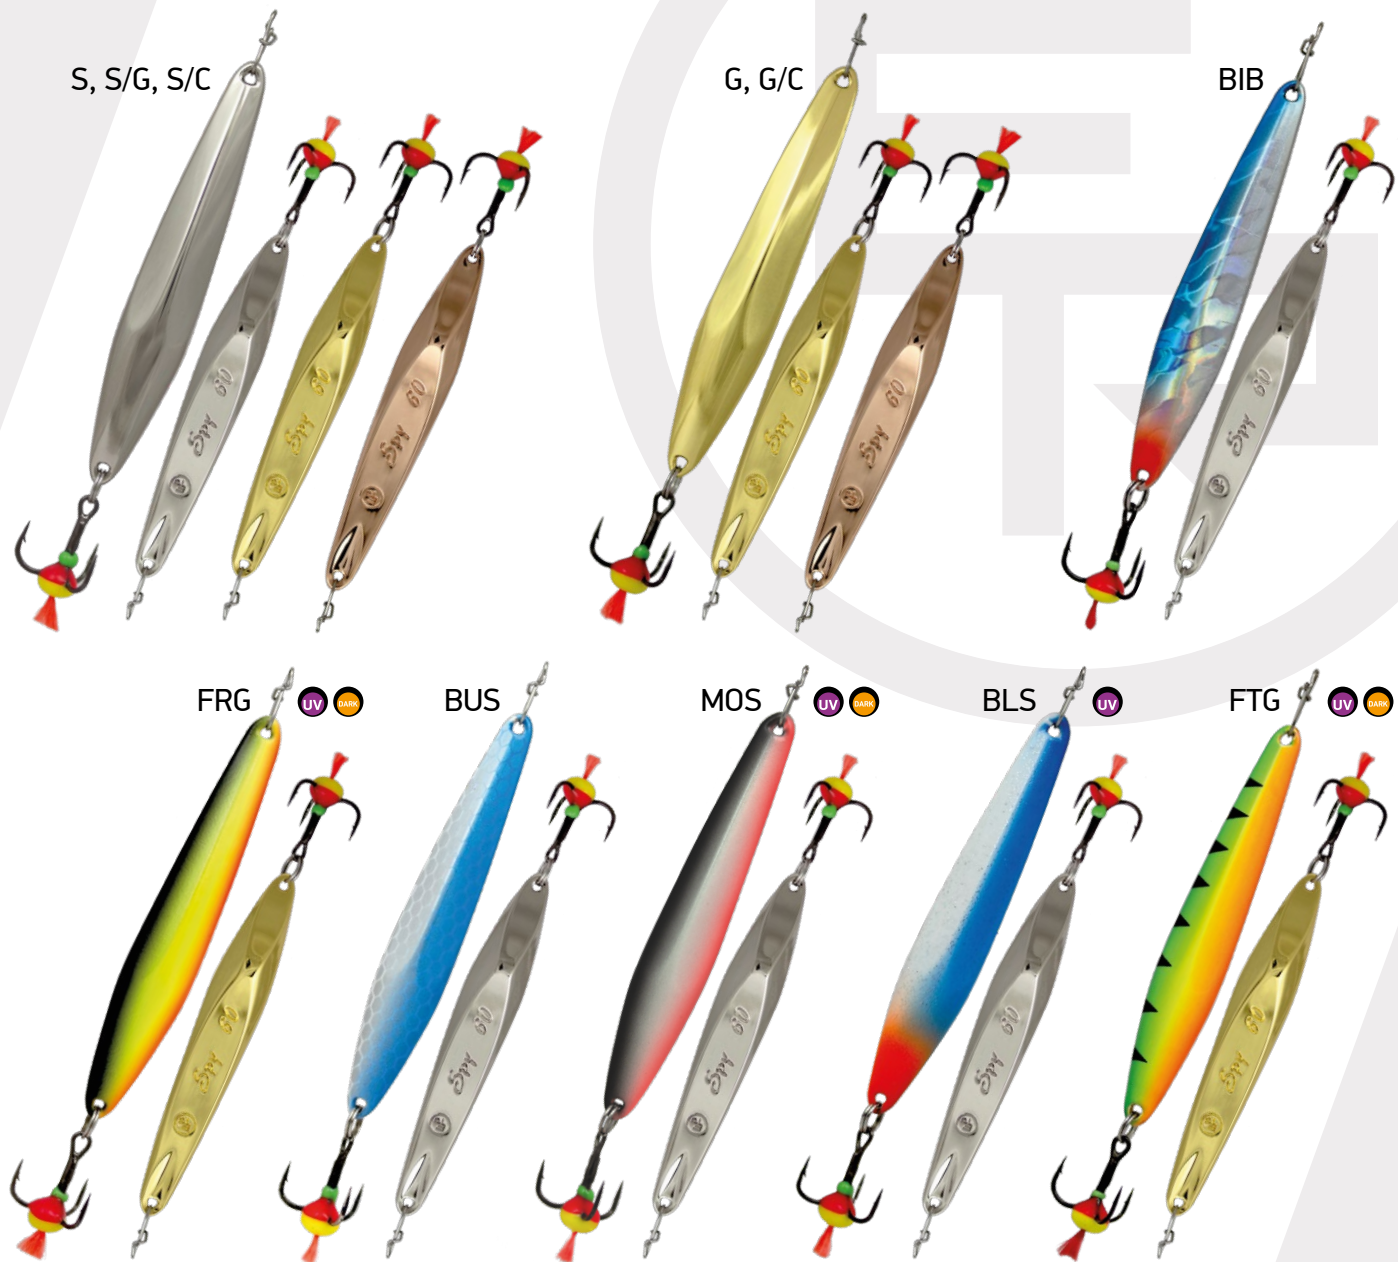

Size, mm	Weight, g	Type of Hook	Hook No	Colours
40	3,5	Treble Hook	14	S, G, S/G, S/C, G/C, BIB, FRG
50	5,5		12	

SPY

The Spy can have a versatile swimming action depending on its presentation. For example, the lure moves in a «falling leaf» manner wobbling from side to side when an angler makes sharp jerks of the rod. Whereas with short gentle upward pulls of the rod, it falls more straight down (sliding aside from the vertical and then returns back). This lure can be successfully used for catching various kinds of predators.

Size, mm	Weight, g	Type of Hook	Hook No	Colours
50	6	Treble Hook	12	S, S/G, S/C, G, G/C, BLS, BUS, FRG, FTG, MOS, BIB
60	10		12	
70	15		10	
80	20		10	
90	25		10	

SHPROT

This spoon features a unique shape, which allows it to fall horizontally in a «falling leaf» manner wobbling from side to side when you are jigging. The Shprot has proven to be effective for catching perch and zander on the Ladoga Lake and the Gulf of Finland. A wide range of sizes and colours allows an angler to choose the right spoon for various fishing conditions.

Size, mm	Weight, g	Type of Hook	Hook No	Colours
50	5	Treble Hook	12	S, S/G, S/C, G, G/C, BLS, BUS, FRG, FTG, MOS, BIB

ERA

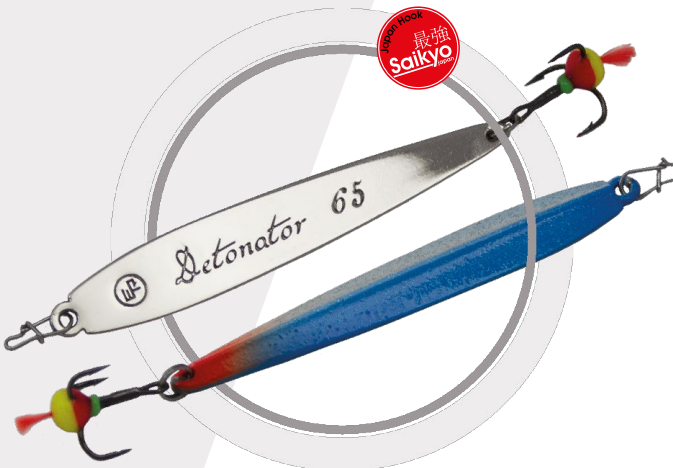

The spoon, which features a slim elongated shape and a versatile swimming action. It works equally well when lifting the rod with a short sharp stroke, or lowering it slowly down. The bigger size spoons proved to be productive when fishing for zander and big perch in large water bodies. The smaller spoons are more suitable for fishing in small water bodies and on the last ice.

Size, mm	Weight, g	Type of Hook	Hook No	Colours
55	5	Treble Hook	12	S, S/G, S/C,
65	7		12	G, G/C, BLS,
75	11		10	BUS, FRG, FTG, MOS, BIB

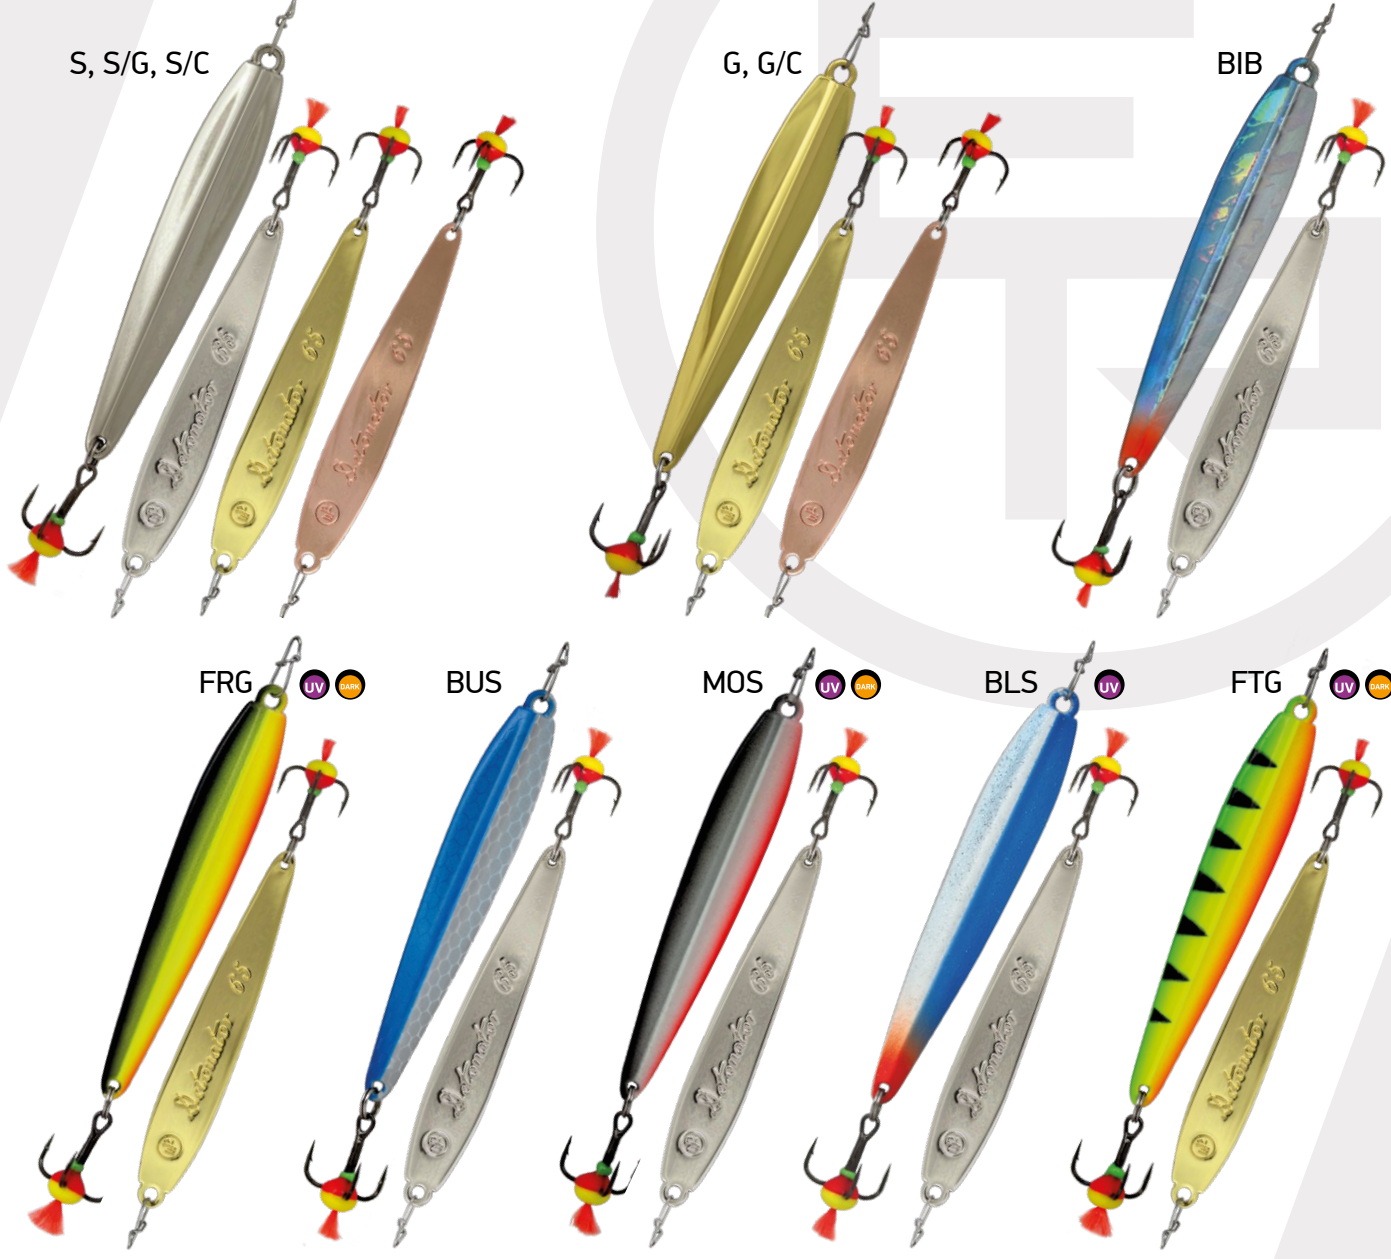

DETONATOR

This is a good «searching spoon», attracting fish from a far distance and featuring a very discernable action. The spoon is gliding, moving away from the vertical line and making side-to-side wobbling action. The design of the lure allows attaching hooks to both ends of the spoon. After attaching the hook to the other end, the lure begins to wobble from side to side more actively on the drop.

Size, mm	Weight, g	Type of Hook	Hook No	Colours
55	4	Treble Hook	12	S, S/G, S/C, G, G/C, BLS, BUS, FRG, FTG, MOS, BIB
65	7		12	
75	9		10	
85	11		10	

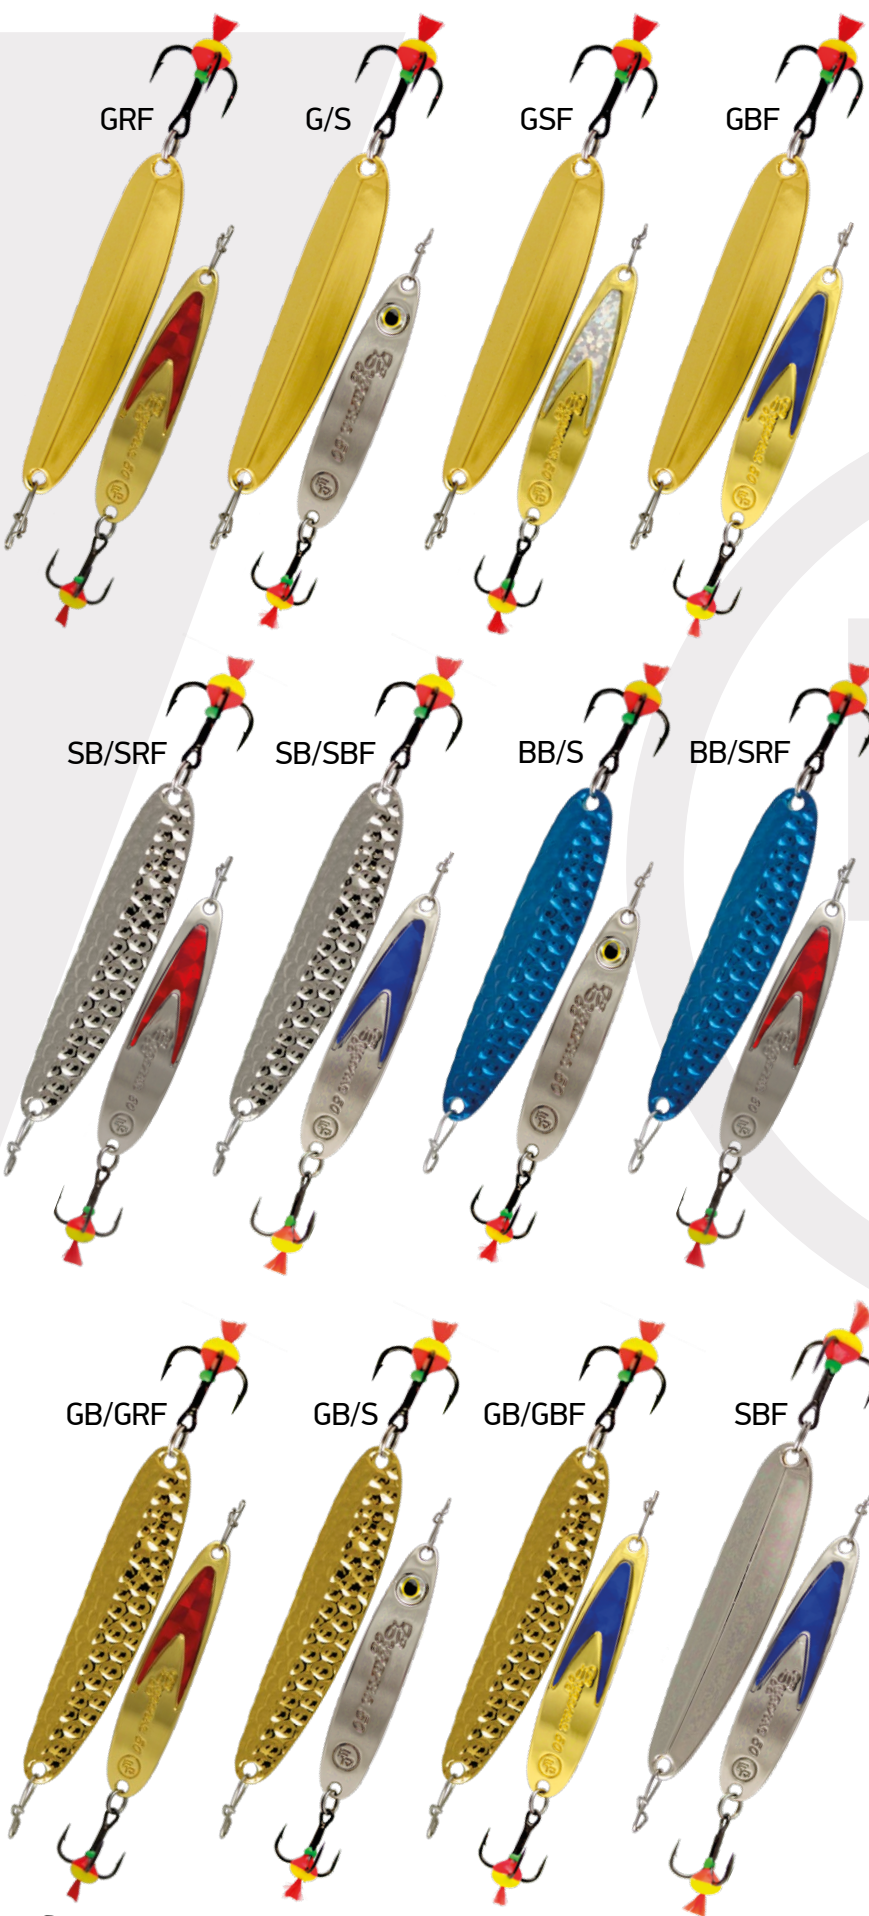

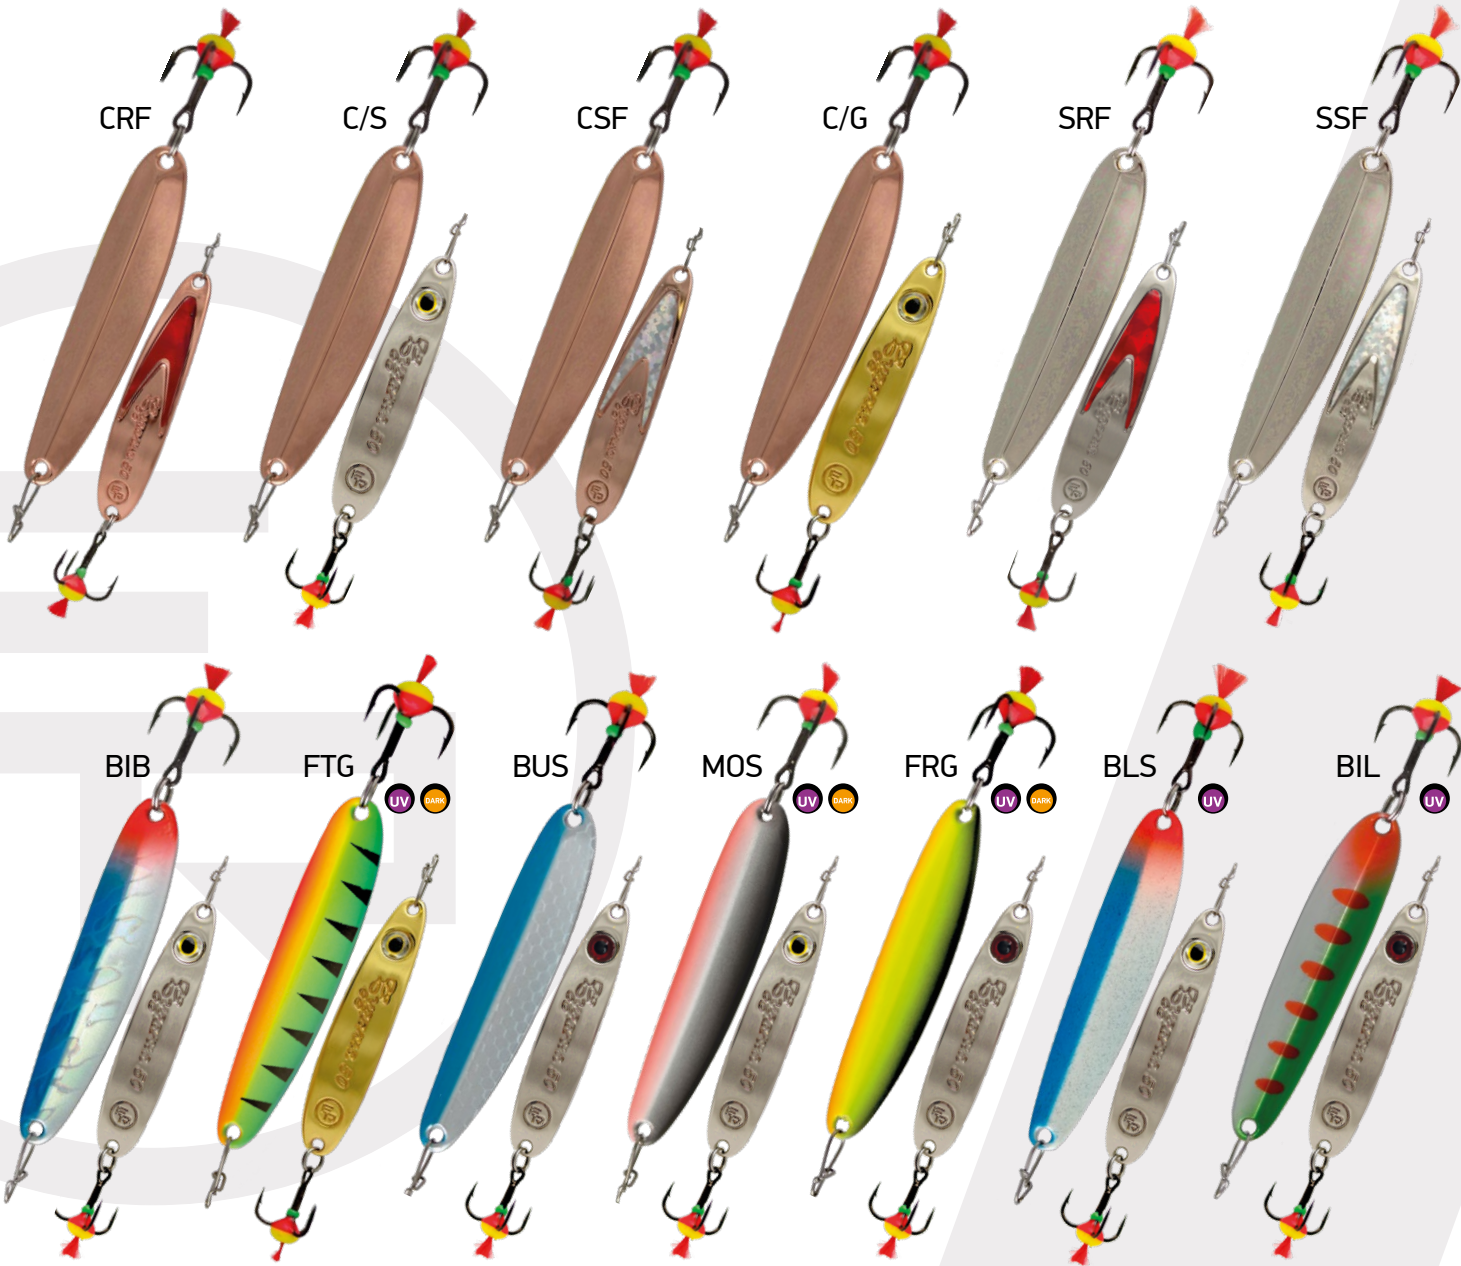

SUDACHYA

This spoon features fluttering action. After a jerk of the rod, the spoon falls with its side-to-side swimming action, moving like a falling leaf. Despite its name «Sudachya» (Russian word for «intended for zander»), it can be perfectly used to catch perch, pike and other freshwater predators as well. The new version of the spoon has a holographic 3D eye.

Size, mm	Weight, g	Type of Hook	Hook No	Colours

50	6		12	
60	10		12	
70	15		10	

KILLER

The Killer is a spoon which lives up to its name. This heavy lure has an elongated shape and is best suited for catching predators in deep lakes and water bodies with current. Being dropped, the spoon lies on its side and slides down and to the side from the vertical line, then on a tight line it moves back to its initial position in the center of the ice-hole. The spoon has a steady swimming action, which is an important advantage when fishing for capricious perch and zander in the periods of low feeding activity.

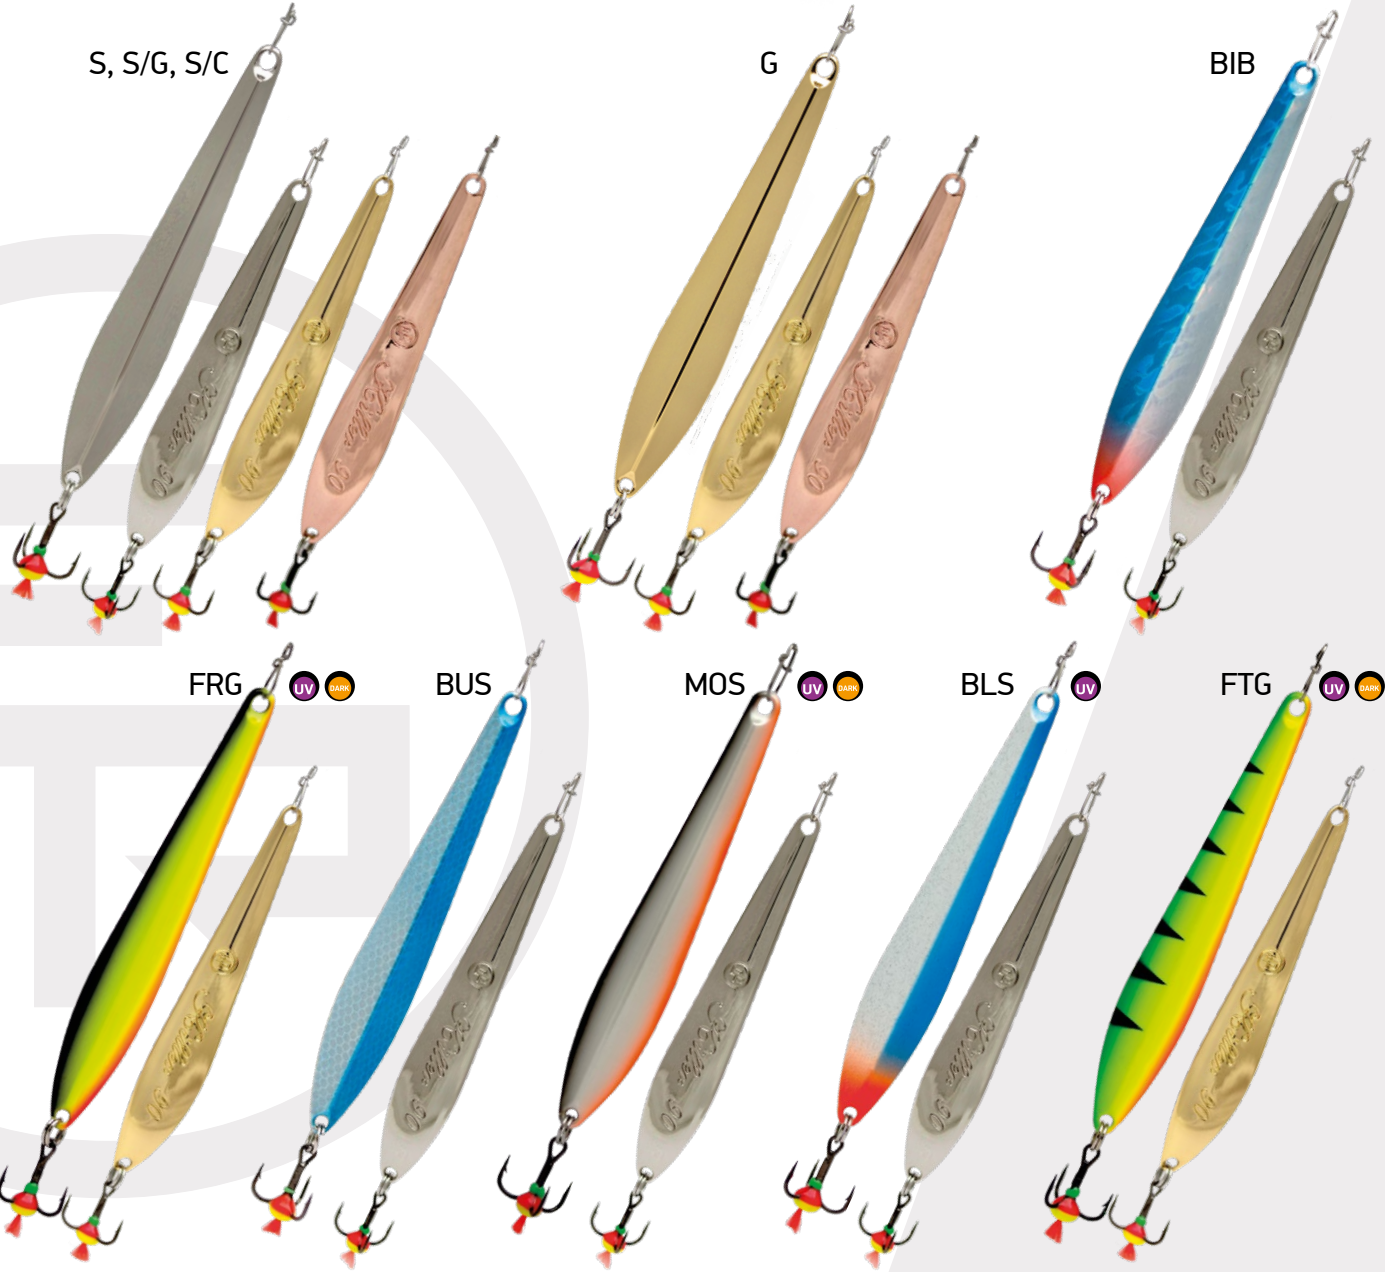

Size, mm	Weight, g	Type of Hook	Hook No	Colours
60	10	Treble Hook	12	S, S/G, S/C, G, G/C, BLS, BUS, FRG, FTG, MOS, BIB

DANCER

The name of this spoon speaks for itself. Its swimming action is unique: on drop, the spoon swims with a wide side-to-side wobble, in a zig-zag manner as if dancing. It doesn't practically move from the vertical line. The shape of the ice jigging spoon Dancer resembles a spindle; it's asymmetric, curved along its axis and slightly along the cross section. It swims like a small minnow. The wobbles of the spoon aren't intensive, they are quite smooth. When being tested, the spoon worked perfectly for zander, perch and pike.
