2017-2018

GLOBAL ROUND UP

The plan was to go fishing heaps, but we still ended up doing a lot in the office and the factory! The development of the Trembler 70XS and the Max 110 has kept me very busy, and we are very happy with the end results. The 70XS is designed for decent forged hooks – whilst keeping a strong action. And the Max 110, well it's going to be a very versatile lure. From casting to trolling to jigging, I'm looking forward to having it on hand in both salt water and estuarine applications. We are also working on new production processes and are looking forward to showing you the results on Facebook and Instagram. A major range reshuffle of our soft plastics, including colours and styles has kept us busy and I'm sure you recognise the changes that have occurred.

Halco relies on some very dedicated staff, at least two have been with us over 25 years and we call Tim the new guy as he's only been here 13 years! They are a great bunch of dedicated people – for which I'm always thankful.

We may see you out on the water or connecting through FB and Insta. Thanks for your support of our company and products. We appreciate it.

Ben Patrick
Managing Director and owner

MAX™

This cutting edge bibless minnow can do the lot, be it jigging, casting or trolling. Max has a highly streamlined design, that gives the lure unbeatable casting ability, while allowing high trolling speeds with minimal resistance. The slender tail section is designed for maximum hook exposure on the strike. Max represents the lure of the future. It goes without saying that Max incorporates Halco's legendary toughness and durability that keep Halco ahead of the rest.

LASER PRO™

The latest in lure technology incorporating strength, durability and fish catching ability. The outer body has extra secure hook anchoring and towing points that are built in as an integral part of the lure body. Halco's Bulletproof bib securing system provides added strength and ensures faultless swimming performance at high and low speeds. Halco Laser Pro lures are precision built for maximum fish catching ability.

LASER PROS ARE NOT JUST ABOUT BLUEWATER. BARRAMUNDI LOVE THEM TOO - CHECK THIS OUT.

UNIQUE

Halco Bulletproof Bibs are pretty tough (polycarbonate's used in bullet proof glass). Combined with our unique, glueless locking method, these bibs stay put. Glueing bibs is a quick fix we leave to our competitors - over time glue solvents can weaken plastic till it snaps. These lures work and keep working, with a bib that's locked in tight for a good fight. Bibs not sold separately.

LASER PRO 120MT™

The Laser Pro 120MT is a 2014 take on a classic lure design.

The latest MT lure version features multiple trebles making it a Mouth Trap for unsuspecting barramundi, mangrove jack and other vicious ambush predators.

The lure is designed for precision casting applications featuring sticky sharp, fine guage forged hooks for great hook sets while retaining superior holding ability.

Available in clear and fully painted finishes, the Laser Pro 120MT is taking you back to the future.

TREMBLER™

Halco Tremblers are virtually indestructible bibless minnows that can be cast, jigged or trolled for outstanding results on a wide variety of sportfish. Advanced design features of the Tremblers include nose weighting producing an extremely lifelike swimming action. Tremblers have the loudest noise and strongest body vibrations of all Halco lures. Hook anchors and towing points made from stainless steel are an integral part of the lure body so they will not pull out.

ROOSTA POPPER™

The Halco Roosta is on the cutting edge of modern popper design with significant new innovations that improve the action and stability of this spectacular surface lure. The head design which is wide at the top transfers to a widened tail end. This unique design creates a popper that is ideal for a straight fast retrieve or a stop and start bloop with exceptional splash. The design minimises cartwheeling and the rattle ensures significant noise coupled with the water spraying action.

C-GAR™

The Halco C-Gar is a weighted stick bait, designed for use on the surface for species such as Australian Salmon, Tailor and Queenfish or alternatively sub surface for all tuna, mackerel and other predatory fish.

The lure action is less splashy than a popper however the unique nose and weighting ensures long casting ability with enough surface action to entice a strike from the wary fish looking for an easy meal.

Featuring heavy duty Mustad trebles and Halco's famously strong fish rings for the ultimate lure to hook connection, the C-Gar is built like all other Halco products, to catch fish day in, day out without fuss and bother.

40GRAM	APPLICATIONS TROLLING/CASTING BUOYANCY - SINKING	

SKIMSTICK 185™

The Skim Stick is a totally unique and innovative design concept for blue water anglers.

A hybrid between stick bait and skittering popper, the Skim Stick imitates a long, narrow profiled baitfish fleeing on the surface from any hungry predators in the area.

It is intended for casting and slow trolling situations and features Halco's new clear polymer technology with internal holographics and scales in some colours while other more traditional finishes are also available in the range.

For the first time, Decoy 5/0 inline single hooks come as standard fare to make the handling active fish less of a risky proposition while giving superior hook setting and holding ability.

HAMMA™

The Halco Hamma is the new frontier of lure technology. It is a clear-bodied, controlled rise casting lure supplied with multiple, easily changeable bibs of varying depths. It gives maximum flexibility in one easy package. Hamma is destined to nail its competition and turn the lure fishing world on its head. The Hamma was designed from the ground up, to tackle some of the world's toughest and most iconic sportfish like Barramundi, Black Bass, Mangrove Jack, Tigerfish and Tarpon.

It has an incredibly realistic baitfish profile, and also features a specially designed weight transfer system for great casting ability, super sharp and strong Mustad trebles for maximum holding potential when using today's modern braided line technology, and Halco's famous heavy duty fish rings. In the water the Hamma has marvellously enticing, tight swimming action with a subtle phase shift mid-cycle that can be used to easily mimic a wounded bait fish.

WHIPTAIL JIG™ / SMITH'S JIG™

WHIPTAIL JIG™

Tested from the barramundi rivers of Northern Australia to the crystal clear tributaries of the Amazon, the Halco Whiptail is a jig with a difference. It has a number of features that make it stand out from the rest, including Mustad Needle Point chemically sharpened hooks and an ingenious rattle system that helps attract fish in dirty water. All this plus a separately tied tail that pulsates in the water make a jig that drive fish wild.

OUTCAST JIG™

SIZES 40g 60g 80g

Following on from outstanding results while bottom fishing, Halco are now offering several of the Outcast range with a jigging hook option. Featuring two Decoy JS-3 jigging hooks, quality squid skirts all tied on US made Kevlar fibre these lures are built for serious micro jigging applications.

Available in 40, 60 and 80g sizes the Outcast Jigs are available in white with blue skirt, redhead with blue skirt, blue with pink skirt, green with pink skirt and gold with pink skirt.

TWISTY JIGS®

SIZES 55g 70g 95g 120g

Twisty Jigs are ready to fish, just tie one on. Rigged with the finest quality components for maximum durability.

METAL LURES

OUTCAST™

SIZES 20g 40g 60g 80g

All sizes are available in gold, blue, green, white and redhead.

The all new Halco Outcast is a rear weighted baitfish profiled casting metal, designed to catch a wide range of species from high speed pelagics to more temperate options such as tailor, salmon and mulloay. Its wider swimming action is highly appealing to all ocean and estuary dwelling predators and has all the fantastic features you have come to expect from Halco, such as their famous heavy duty "Fish Rings" and high quality Mustad hooks. The smooth, highly streamlined shape means the lure will cast a country mile even into strong headwinds and is available in 20, 40, 60 and 80g weights. The Outcast comes in 6 great colours and is a must have tool in any serious fisher's tackle box.

METAL LURES

HALCO STREAKER™

SIZES 10g 20g 30g 40g 55g

The hole in the Streaker creates an exciting bubble trail which has proven to be an exceptional fish attractant when seen from below the surface. The eight reflective sides create attractive flash. A unique combination of bubble and flash.

HALCO WOBBLER OR WOBBLER SPARKLER™

SIZES 5g 10g 20g 30g 40g

This well proven lure has plenty of applications. Its shape is ideal for slower retrieves as well as jigging for small and large fish alike. The fish shape can trigger a predator to strike the lure. The standard Wobbler has a blood red teaser attached to the rear fish ring and the Wobbler Sparkler is covered with a holographic sparkle for added reflection.

HALCO KIMBERLEY™

SIZES

3 inch - 76mm	4 inch - 100mm
5 inch - 127mm	6 inch - 152mm

A super strong spoon made from marine grade stainless steel. The eight reflective surfaces ensure the strong flashes attract fish lurking down deep.

HALCO BARRA OR BARRA SPARKLER™

SIZES

3 inch - 76mm	4 inch - 100mm
5 inch - 127mm	6 inch - 152mm

The preferred lure of professionals, the Barra spoon is made from marine grade stainless steel. Its lively action makes it ideal for pelagic species.

Reflecta Colours Red, Blue or Chartreuse

AFTER YEARS OF HARD BODY LURE DESIGN AND MANUFACTURING, HALCO HAS FORGED A NEW PATH INTO THE SOFT PLASTIC INDUSTRY.

New soft plastic **Rubber Stretch Technology** ensures the Halco Madeyes range reflects our ethos of a high quality, strike-effective product. We are determined to push the boundaries of traditional soft plastic colours and shapes.

R.S.T.™ RUBBER STRETCH TECHNOLOGY

Madeye's RST (Rubber Stretch Technology) is a unique rubber copolymer that has two advantages over standard soft plastics.

RST is up to five times more durable than standard plastic, and is also buoyant, enabling the lure to float and wriggle when sitting on the bottom.

TOOLS & CLOTHING

Halco Fish Ring Pliers

At Halco we put millions of fish rings on its products every year. It goes without saying we need easy to use pliers, that don't stretch the ring when applying it to the lure or when changing out a treble.

This truly unique and patented design has been developed and refined by Halco Tackle to give optimal performance and long lasting service as they do here in the factory.

They are used in the factory for all our products, from our tiny #2 fish rings right through to the large #7xx (95kg) fish rings. The fish ring pliers are also fine to use on any other commercially available split rings in the market.

Made out of hardened tool steel, the useful life of the product outdoors will be extended by rinsing in fresh water if it has been immersed in salt water and applying a light coating of spray oil to the steel parts.

For information on how these pliers work visit the "Halco Tackle" YouTube Channel for a short clip on how they work so well.

CLOTHING AVAILABLE EXCLUSIVELY AT [HTTP://SHOP.HALCOTACKLE.COM](http://shop.halcotackle.com)

Halco Tournament Shirts

Halco's striking new tournament shirts are ideal for long, hot days out on the water. Worn by Ben, Neil and Tim, these shirts offer the best combination of wearability and fishing fashion. They are long sleeved and Australian made featuring material that stays cool even in the hottest of conditions, dries quickly and offers an SPF 50+ sun protection rating.

SIZE	S	M	L	XL	XXL

Halco Caps - One size fits all.

Proudly worn by many of Australia's finest anglers, Halco now makes its caps available for purchase to its supporters. Available in bright red and classic navy, Halco caps feature an embroidery Halco logo at the front with side panel embroideries of yellowfin tuna on the left and giant trevally on the right. The cap also uses custom Halco Tackle piping on the visor with alternating trevally and yellowfin tuna accents woven into the headband. These one size fits all caps are adjustable via a soft Velcro closure at the back and offer great protection from the glare encountered in many fishing conditions.

TILSAN TIMBER LURES

TILSAN BIG BARRA

The Big Barra is the new dimension in timber lures. This suits trolling deep for big predators as well as being a perfectly weighted cast and retrieve lure. With an action that starts with the smallest twitch of the rod tip and near neutral buoyancy, the Big Barra is the ideal lure to twitch around snags and structure when a large profile lure is required.

TILSAN BARRA

The Tilsan Barra is the most versatile timber lure ever made. From dead slow twitch retrieve in the snags, to a super fast troll out wide, the Tilsan Barra Lure can handle it all. With its centreline design stainless steel frame and Tilsan's unsurpassed quality, the Tilsan Barra is a must-have in every serious fisherman's tackle box. If you're after a lure that does the lot - you can't go past the Tilsan Barra.

TILSAN BASS

The Tilsan Bass is one of the fastest diving lures around. Reaching a depth of 3.5metres in an average cast, makes it an excellent lure for fishing deep-water snags and fast drop-offs. With its centreline design framing system, you are assured of landing that deep water monster.

TILSAN MINNOW

The Tilsan Minnow was one of the first Tilsan lures on the market. Its success as a high performance fish catching tool has enabled Tilsan to produce the world's greatest timber fishing lures. With a natural baitfish profile and near lifelike decoration, the Tilsan Minnow is at the forefront of lure technology in the world today. Built around Tilsan's famous centreline design framing system, it's an incredibly strong and versatile lure for its size.
